

DEFINED DURATION 10 ETF (DDX)

WHY DDX?

1. PLANNING BASED.

The Defined Duration 10 ETF seeks a balance of growth of capital and capital preservation. The Fund is designed to be utilized across 7-15 year time horizons to match to specific financial planning needs.

2. 10 YEAR ASSET ALTERNATIVE.

Most multi-asset stock/bond funds allow the market cap of the stock market to dominate the fund's volatility which may result in excessive volatility at the most unpredictable times. The goal of DDX is to provide an alternative solution to better control volatility skew and help maintain more predictable returns over 10 year time horizons while maintaining balanced goals of growth and principal stability.

3. COUNTERCYCLICAL REBALANCING.

The fund maintains a more consistent average defined duration profile by rebalancing in a countercyclical manner. Unlike "balanced funds", which often allow the stock market to dominate volatility, DDX targets better control for balance which may help create more stable returns over the expected 10 year time horizon.

4. SYSTEMATIC. LOW COST. TAX EFFICIENT.

DDX is an elegant, but simple ETF that maintains low costs and a tax efficient rebalancing methodology. It does all of this in a diversified, algorithmic and systematic fund of funds structure.

DEFINED DURATION 10 ETF (DDX)

Fund Performance as of 12/31/2025	1 Month	3 Month	YTD	1 Year	Since Inception (09/21/2021)
Market Price	0.53%	2.03%	12.01%	12.01%	8.15%
NAV	0.50%	2.00%	12.04%	12.04%	8.16%

Past performance does not guarantee future results. The performance data quoted represents past performance and current returns may be lower or higher. The investment return and principal will fluctuate so that an investor's shares when redeemed may be worth more or less than the original cost. The Fund's most recent month-end performance can be found at disciplinefunds.com. Returns for less than one year are not annualized.

Net asset value ("NAV") returns are based on the dollar value of a single share of the ETF, calculated using the value of the underlying assets of the ETF minus its liabilities, divided by the number of shares outstanding. The NAV is typically calculated at 4:00PM EST on each business day the exchange is open for trading. Market returns are based on the trade price at which shares are bought and sold. Market performance does not represent the returns you would receive if you trades shares at other times. Total return reflects reinvestment of distributions on ex-date for NAV returns and payment date for Market Price Returns. The market price of the ETF's shares may differ significantly from their NAV during periods of market volatility.

IMPORTANT DISCLOSURES

The Fund's investment objectives, risks, charges and expenses must be considered carefully before investing. [Click here](#) for the Fund's Prospectus, and [here](#) for the Fund's SAI. All fund documents can be found at <https://disciplinefunds.com/documents/>. A free hardcopy of any prospectus may be obtained by calling +1.215.882.9983. Read carefully before investing.

Investments involve risk. Principal loss is possible. The Defined Duration 10 ETF has the same risks as the underlying securities traded on the exchange throughout the day. Unlike mutual funds, ETFs may trade at a premium or discount to their net asset value. Investments in foreign securities involve political, economic, and currency risks, greater volatility and differences in accounting methods. These risks are magnified in emerging markets. DDX is inherently "countercyclical" and may underperform its benchmark for long periods of time.

There is no assurance that the Funds will achieve their investment objectives.

Rebalancing and tax-efficient management strategies may not prevent losses in declining markets. Tax outcomes are not guaranteed, and investors may still receive taxable distributions. Investors should consult their own tax advisors regarding the tax consequences of an investment in the Funds. **Bond and Fixed Income Risks.** Changes in interest rates generally will cause the value of fixed-income and bond instruments held by underlying bond ETFs to vary inversely to such changes.

Frontier Markets Risk. Compared to foreign developed and emerging markets, investing in frontier markets may involve heightened volatility. **Fund of Funds Risk.** Because it invests primarily in other funds, the Fund's investment performance largely depends on the investment performance of the selected underlying exchange-traded funds (ETFs). **New Fund Risk.** The Fund is a recently organized management investment company with limited operating history. There can be no assurance that the Fund will grow to or maintain an economically viable size.
